### <u>CABLEVISION SYSTEMS CORPORATION</u> <u>PETITION FOR DETERMINATION OF EFFECTIVE COMPETITION</u>

Cablevision Systems Corporation, on behalf of its affiliates (collectively, "Cablevision") hereby submits this Petition for a Determination of Effective Competition ("Petition"), pursuant to Sections 76.6, 76.7, 76.905 and 76.907 of the rules and regulations of the Federal Communications Commission ("Commission"), to request that the Commission determine that Cablevision faces effective competition in the above-captioned service areas in New York.

#### INTRODUCTION AND SUMMARY

Under the standards set forth in the Cable Act (the "Act"), a cable system is subject to effective competition if the franchise area is "served by at least two unaffiliated multichannel video programming distributors each of which offers comparable programming to at least 50 percent of the households in the franchise area," and "the number of households subscribing to multichannel video programming other than the largest multichannel video programming distributor exceeds 15 percent of the households in the franchise area" ("Competing Provider Test"). As set forth below, DirecTV and EchoStar's DISH Network offer comparable service throughout Cablevision's service areas in the following New York communities: Amenia town, Clinton town, Dover town, East Fishkill town, Kent town, Marlborough town, Millbrook village, Millerton village, North East town, Pine Plains town, Union Vale town, Stanford town, Plattekill town, Washington town, Atlantic Beach village, Old Westbury village, Greenville town, Minisink town, Unionville village, Bellport village, Greenport village, Tuxedo Park village, and Florida village (collectively, "Communities"). 27

\_

<sup>47</sup> U.S.C. § 543(l)(1)(B)(i),(ii); 47 C.F.R. § 76.905(b)(2).

According to Cablevision's records, the New York Public Service Commission regulates the Basic service tier rates for the following communities: Atlantic Beach village, Bellport village, Florida village, Greenport village, Tuxedo Park village, Clinton town, Dover town, Millbrook village, Pine Plains town, Union Vale town, Washington town, Plattekill town, Old Westbury village. While Cablevision's records indicate that the remaining above-captioned communities have not obtained certification to regulate Basic service tier rates, nor delegated such authority to the New York Public

Data submitted with this Petition demonstrate that over fifteen percent (15%) of the households in each of the Communities subscribe to a multichannel video programming distributor ("MVPD") other than Cablevision. Thus, the Competing Provider Test is met in each of the Communities. Accordingly, the Commission should find that Cablevision meets the Act's standard for effective competition in each of the Communities, and that the franchise area is no longer subject to rate regulation.<sup>3/</sup>

### I. CABLEVISION SATISFIES THE COMPETING PROVIDER TEST FOR EFFECTIVE COMPETITION IN EACH OF THE COMMUNITIES

### A. Competing Providers Offer Comparable Programming to over Fifty Percent of the Households in each of the Communities

Competing providers, none of which are affiliated with Cablevision, are available and offer comparable programming to more than fifty percent (50%) of the households in each of the Communities. DirecTV and Echostar's DISH Network offer service in each of the Communities.

The Commission previously has found that "DBS service is presumed to be technically available due to its nationwide satellite footprint," and "presumed to be actually available if households in the franchise area are made reasonably aware that the service is available" and

Service Commission, Cablevision files the instant petition in order to obtain a determination of effective competition and Commission confirmation that it cannot be subject to rate regulation in such communities, specifically: Amenia town, Greenville town, Millerton village, Minisink town, Unionville village, North East town, Stanford town, East Fishkill town, Kent town, Marlborough town. *See, e.g., Bresnan Communications, LLC, Petition for Determination of Effective Competition in 28 Communities in Colorado*, 26 FCC Rcd 6137, ¶ 1 (2011) (granting effective competition for communities that were not rate regulated and noting that Bresnan was seeking "formal exemption from the beginning of regulation under current conditions").

<sup>&</sup>lt;sup>3</sup>/ 47 U.S.C. § 543(a)(2).

See, e.g., Time Warner Entertainment - Advance/Newhouse Partnership d/b/a Time Warner Cable, Petition for Determination of Effective Competition in Nineteen California Franchise Areas, 20 FCC Rcd 15709, ¶ 3 (2005); Jones Intercable, Inc., Petition for Determination of Effective Competition, 15 FCC Rcd 7257, ¶ 4 (2000) ("Jones Intercable").

reception equipment and subscription service is similarly reasonably available.<sup>5/</sup> Under the Commission's rules and procedures for effective competition proceedings, DirecTV and DISH Network are presumptively available to cable subscribers in any franchise area.<sup>6/</sup> The Communities are within the satellite footprint of DirecTV and Echostar's DISH Network. The Commission's rules further provide that there must be no regulatory, technical, or other impediments to households taking the competitors' programming service.<sup>7/</sup> Cablevision is not aware of any local regulations prohibiting reception by home satellite dishes or placement of home satellite dishes on local property to receive satellite services.

Households may be made "aware" of the availability of competing services and equipment "through any sort of local, regional, or national media, provided that such media reach the community in question." As the Commission has recognized, DBS service "is well known nationwide and is advertised continually in media that reach every part of the country, even if not in every local newspaper." Residents in each of the Communities are aware of the

\_

See, e.g., Bright House Networks, Petition for Determination of Effective Competition in Six Communities in California, 23 FCC Rcd 16992, ¶ 5 (2008) ("Bright House Networks"); Subsidiaries of Cablevision Systems Corporation, Petitions for Determination of Effective Competition in 101 Communities in New Jersey, 23 FCC Rcd 14141, ¶ 5 (2008); Liberty Cablevision of Puerto Rico, Ltd., Petition for Determination of Effective Competition in Seven Local Franchise Areas in the Commonwealth of Puerto Rico, 21 FCC Rcd 11995, ¶ 5 (2006); Jones Intercable ¶ 4; see also Implementation of Sections of the Cable Television Consumer Protection and Competition Act of 1992, Rate Regulation, 8 FCC Rcd 5631, ¶ 32 (1993) ("Cable Order").

Mountain Cable Company d/b/a Adelphia Cable Communications, et al., 14 FCC Rcd 13994, ¶ 15 (1999) ("Mountain Cable") (determining that DBS providers that provide nationwide service are presumed to satisfy the 50 percent threshold); Cable Order ¶ 32; Reexamination of the Effective Competition Standard for the Regulation of Cable Television Basic Service Rates, 6 FCC Rcd 4545, ¶ 42 n.52 (1991) (presuming DBS service to be available nationwide when any one DBS licensee begins operations).

<sup>47</sup> C.F.R. § 76.905(e).

Cable Order ¶ 32; see also Mediacom Southeast, LLC, Four Petitions for Determination of Effective Competition in Twenty-One Local Franchise Areas, 21 FCC Rcd 3506, ¶ 3 (2006) ("Mediacom Southeast") (accepting evidence of national advertising for DBS service).

I/M/O of Time Warner Entertainment-Advance/Newhouse Partnership, Petition for

availability of competing service from DBS providers via television advertising spots that run in the area, <sup>10/</sup> as well as through print advertisements in national publications, and service, marketing and promotional materials available to any resident with an Internet connection. <sup>11/</sup> DirecTV's website advertises new customer packages for \$29.99 per month for one year, which provides more than 140 channels, plus free HBO, Starz, Cinemax and Showtime for three months, and a free HD DVR and three HD Receivers upgrade. <sup>12/</sup> The DISH Network's website advertises new customer packages for \$29.99 per month for more than 120 channels, plus free HBO, Starz, Cinemax and Showtime for three months and free HD for life. <sup>13/</sup>

Thus, "[g]iven the saturation of DBS advertising on all facets of today's media," it would be difficult to argue that residents in each of the Communities are not reasonably aware of the availability of DBS services. <sup>14/</sup> As the Commission has recognized, "[a]s long ago as 2005, DirecTV and DISH became the second and third largest MVPDs in the country, with tens of millions of subscribers." <sup>15/</sup> Indeed, the Commission's most recent *Video Competition Report* indicates that DBS subscribers represent 29.2% of all MVPD subscribers nationwide. <sup>16/</sup> Thus,

Determination of Effective Competition in Wilson, North Carolina, 26 FCC Rcd 3829, ¶ 7 (2011) ("Time Warner 2011 Order").

Exhibit 1, Declaration of Paul Jamieson ("Jamieson Declaration"); *see* Exhibit 2 (examples of print and television advertisements).

See Exhibit 2; see also Cathy Woodruff, DirecTV Dish Lands on Wrong Albany Roof, THE TIMES-UNION (June 13, 2010) (reporting on an incident involving local DirecTV subscribers in Albany, NY); Craig Wolf, Cable TV vs. Satellite: Which is Best for You?, THE JOURNAL NEWS (Jan. 11, 2007) (reporting on the growing popularity of satellite in the Hudson Valley region).

*Time Warner 2011 Order* ¶ 7.

Annual Assessment of the Status of Competition in the Market for the Delivery of Video Programming, Thirteenth Annual Report, 24 FCC Rcd 542, ¶ 8 (2009) ("13th Video Competition")

residents of the Communities "may be deemed reasonably aware of the availability of DBS services." 17/

The programming offered by DirecTV and Echostar's DISH Network is comparable to that offered by Cablevision in the Communities. The Commission has defined programming to be "comparable" when it offers "at least 12 channels of video programming, including at least one channel of nonbroadcast service programming." Cablevision's system serving the Communities offers more than 60 channels of video programming, while DirecTV and DISH Network both offer well over 100 channels, including substantial non-broadcast service channel offerings. The Commission has "consistently found that the programming of both DBS providers satisfies the programming comparability component of the competing provider effective competition test."

### B. Competing MVPDs Serve More than Fifteen Percent of the Households in each of the Communities

A cable operator is subject to effective competition if more than fifteen percent (15%) of the households in its franchise area subscribe to programming services offered by alternative

*Report*"). The Commission also found that "almost all consumers are able to obtain programming through over-the-air broadcast television, a cable service, and at least two DBS providers."  $Id. \P 4$ .

MVPDs.<sup>22/</sup> The subscribers of all unaffiliated MVPDs, other than the largest, may be aggregated to satisfy this 15% threshold.<sup>23/</sup> Effective competition, therefore, is calculated by adding the total of all subscribers to all MVPDs other than Cablevision.<sup>24/</sup> As noted above, in each of the Communities, these MVPDs include DirecTV and EchoStar's DISH Network.

In each of the Communities, Cablevision is either the largest MVPD or, in combination with another MVPD, serves more than 15% of the community.<sup>25/</sup> The Table below provides occupied household data for each of the Communities, which is based on the most recent Census information available.<sup>26/</sup> DBS subscribership data compiled by the Satellite Broadcasting and

<sup>22/</sup> 47 U.S.C. § 543(1)(1)(B)(ii); 47 C.F.R. § 76.905(b)(2).

<sup>23/</sup> Time Warner Entertainment Co., L.P. et al. v. FCC, 56 F.3d 151, 189 (D.C. Cir. 1995); Mountain Cable ¶ 14.

See, e.g., Mediacom Minnesota LLC Petition for Determination of Effective Competition in Various Minnesota Franchise Areas, 21 FCC Rcd 11742, ¶ 9 (2006).

Exhibit 1, Jamieson Declaration. See Time Warner Cable Inc., Petition for Determination of Effective Competition in 105 Franchise Areas in Ohio, 25 FCC Rcd 14422, ¶ 6 (2010) ("Petitioner asserts that it is the largest MVPD in some of the Attachment A and B Communities and that, in others, both it and the DBS providers have subscribership exceeding 15 percent. Petitioner correctly asserts that, assuming the validity of these subscribership numbers, it is subject to effective competition in the latter Communities. If Petitioner is the largest MVPD there, then the DBS providers' subscribership exceeds 15 percent. On the other hand, if one of the DBS provider is the largest MVPD, then the combined subscribership of Petitioner and the other DBS provider exceeds 15 percent. Either way, the subscribership of the MVPDs other than the largest one exceeds 15 percent."); see also Comcast Cable Communications, LLC, Petitions for Determination of Effective Competition in Various Colorado Communities, 25 FCC Rcd 13678, n.14 (2010) (noting that in certain communities, "both the Comcast penetration figure and the aggregate DBS figure clearly exceed 15 percent. Comcast argues that it is subject to effective competition because in addition to DBS penetration exceeding 15 percent of the occupied households, the number of Comcast subscribers also exceed 15 percent and the Commission has recognized that in such cases the second prong of the competing provider test is satisfied.").

<sup>2010</sup> Census Occupied Housing Data was used for all of the communities with the exception of Kent, NY and Marlborough, NY. Cablevision's franchise areas in both Kent and Marlborough encompass only a small portion of each of those municipalities. For franchise areas that cover only a portion of a municipal area, MBC only has access to 2000 Census occupied housing data. A copy of the relevant Census data is attached hereto as Exhibit 5. The Commission has stated that for purposes of calculating effective competition, it will accept Census data as reliable, as long as cable operators use the most recently available data. See, e.g., Marcus Cable Associates d/b/a Charter Communications, Petitions for Determination of Effective Competition, 16 FCC Rcd 14435, ¶ 3 n.8 (2001); MCC Iowa, LLC & Mediacom Iowa, LLC Petition for Determination of Effective Competition in Various Local Franchise Areas, 21 FCC Rcd 3457, ¶ 4 (2006). For Kent and Marlborough, MBC determined the

Communications Association ("SBCA") and Media Business Corp. ("MBC") for each of the Communities is also listed in the Table.<sup>27/</sup>

The DBS subscribership data is current as of November 30, 2011, <sup>28/</sup> and the zip codes used by SBCA to compile the data are set forth in Exhibit 7.

occupied households for the specific franchise areas by using a statistical allocation method that relied upon the most recent housing data for the portions of those two municipalities served by Cablevision.

Data on direct-to-home ("DTH") DBS subscribership is at Exhibit 6. The Commission routinely has accepted data from SBCA and MBC. See, e.g., Mediacom Southeast ¶ 4; Texas Cable Partners, L.P., Petition for Determination of Effective Competition, 16 FCC Rcd 4718, ¶ 8 (2001); see also Texas Cable Partners, L.P., Petition for Determination of Effective Competition in Certain Communities in Texas, 16 FCC Rcd 4886, ¶¶ 3-6 (2001).

Exhibit 6.

The data demonstrates that Cablevision faces effective competition in each of the Communities because competing providers serve more than 15% of all households in each of the Communities. Accordingly, pursuant to the Commission's rules, the basic service tier and associated equipment and installation rates in each of the Communities should be deregulated because Cablevision has demonstrated the presence of effective competition under the Competing Provider Test.

2

Cablevision utilized 5-digit DTH subscriber data obtained from SBCA to compute the franchise area competing provider penetration data shown in the Table for the Communities. *See, e.g., Comcast Cable Communications, LLC, Petition for Determination of Effective Competition in Nine Texas Communities*, 26 FCC Rcd 7709, ¶ 18 (2011) (noting that the Commission has "repeatedly declined to require the use of nine-digit zip code-based data in showings of competing provider effective competition" and "consistent with [] longstanding practice" accepted the five-digit zip code information provided by Comcast); Public Notice, *Commission Clarifies Standards for Evidence of Competing Provider Effective Competition for Cable Service*, 24 FCC Rcd 8198 (2009) ("After further consideration, the Commission will not require the use of Nine-Digit data in any showing of competing provider effective competition. Rather, the Commission will, as it has in the past, entertain filings by cable operators using Five-Digit, Nine-Digit, or other kinds of evidence.").

#### **CONCLUSION**

For the above reasons, Cablevision's Petition for a Determination of Effective

Competition should be granted,

Respectfully submitted,

Paul Jamieson Vice President, Legal and Regulatory Affairs Cablevision Systems Corporation 1111 Stewart Avenue Bethpage, NY 11714-3581 (516) 803-2544

### Exhibit 1

#### **DECLARATION OF PAUL JAMIESON**

- I, Paul Jamieson, do hereby declare and state under penalty of perjury as follows:
- 1. I am Vice President, Legal and Regulatory Affairs for Cablevision Systems Corporation ("Cablevision"). My duties require me to be fully familiar with the operations of the franchises served by Cablevision in the following New York communities: Amenia town, Clinton town, Dover town, East Fishkill town, Kent town, Marlborough town, Millbrook village, Millerton village, North East town, Pine Plains town, Union Vale town, Stanford town, Plattekill town, Washington town, Atlantic Beach village, Old Westbury village, Greenville town, Minisink town, Unionville village, Bellport village, Greenport village, Tuxedo Park village, and Florida village (collectively, "Communities"). I make this affidavit based on my personal knowledge in my position.
- 2. Television and radio advertisements for DBS service offered by DirecTV and EchoStar's DISH Network can be seen and/or heard on TV and radio stations available in the Communities. Print advertisements and other marketing materials promoting the availability of DBS service from DirecTV and EchoStar's DISH Network are also accessible to residents in the Communities.
- 3. In each of the Communities Cablevision is either the largest MVPD or, in combination with another MVPD, serves more than 15% of the community. Cablevision's franchise areas in Kent and Marlborough encompass only a small portion of each of those municipalities. MBC determined the occupied households for those specific service areas by using a statistical allocation method.
- 5. I have read the forgoing Petition for Determination of Effective Competition. With respect to statements made in the Petition, other than those of which notice can be taken, the facts contained therein are true and correct to the best of my personal knowledge, information, and belief.

Paul Jamieson

# Exhibit 6

Following a detailed analysis of Cablevision franchise areas, utilizing direct to home (DTH) satellite subscriber data provided by the Satellite Broadcasting & Communications Association (SBCA) and occupied households from the 2010 Census, MediaBiz has determined the following effective competition status:

		M 135		Census	DELLO
Community	County	State	DTH*	2010 Households	DTH % Penetration
Amenia	Dutchess	NY	311	1741	17.86%

<sup>\*</sup>Oldest data from 11/30/2011

To arrive at these results MediaBiz utilized a multi-step process to identify cable client franchise areas and associated 5-digit United States Postal Service (USPS) ZIP codes and, in turn, produced a statistical allocation figure. The allocation figure identifies the percentage of a ZIP code's total block level Census households located within a particular franchise area.

MediaBiz's ZIP code mapping process was utilized in order to obtain proper allocation figures to "split" ZIP codes into their respective franchise areas. Once MediaBiz correctly identified each franchise area in consultation with Cablevision, MediaBiz mapped all potentially overlapping ZIP codes to each franchise area.

Per this mapping, MediaBiz identified, in square miles, those portions of a ZIP code area within a particular franchise area. MediaBiz then populated the split ZIP code boundaries with census block households per the 2000 Census.

The process produced, for each ZIP code: (1.) the total census block level HHS in the entire 5-digit ZIP code; (2.) The census block level HHS in the portion of the ZIP code that overlaps the franchise area; and (3.) a percentage figure, corresponding to the portion of the ZIP code HHS within the franchise area.

The percentage figure yielded above was then applied to the direct-to-home (DTH) satellite subscriber counts provided by the SBCA. This, in turn, produced an adjusted DTH count (referred to above as "DTH"), which reflects a statistical estimate of the number of actual DTH subscribers (i.e., households) residing within each franchise area. The DTH count is divided by the total Census HHs for each franchise to produce the Effective Competition penetration estimate reported above.

Our methodology has been used by many multiple system operators (MSOs) as part of their Effective Competition relief efforts, and we believe this methodology produces the most accurate and detailed view of 5-digit ZIP code data as it relates to cable franchise areas.

Following a detailed analysis of Cablevision franchise areas, utilizing direct to home (DTH) satellite subscriber data provided by the Satellite Broadcasting & Communications Association (SBCA) and occupied households from the 2010 Census, MediaBiz has determined the following effective competition status:

		01.1	DTI 14	Census 2010	DTH %
Community	County	State	DTH*	Households	Penetration
Clinton	Dutchess	NY	349	1602	21.79%

<sup>\*</sup>Oldest data from 11/30/2011

To arrive at these results MediaBiz utilized a multi-step process to identify cable client franchise areas and associated 5-digit United States Postal Service (USPS) ZIP codes and, in turn, produced a statistical allocation figure. The allocation figure identifies the percentage of a ZIP code's total block level Census households located within a particular franchise area.

MediaBiz's ZIP code mapping process was utilized in order to obtain proper allocation figures to "split" ZIP codes into their respective franchise areas. Document Preparation Date: 24 Jan 2012

Following a detailed analysis of Cablevision franchise areas, utilizing direct to home (DTH) satellite subscriber data provided by the Satellite Broadcasting & Communications Association (SBCA) and occupied households from the 2010 Census, MediaBiz has determined the following effective competition status:

			1.6	Census 2010	DTH %
Community	County	State	DTH*	Households	Penetration
Millbrook	Dutchess	NY	143	691	20.69%

<sup>\*</sup>Oldest data from 11/30/2011

To arrive at these results MediaBiz utilized a multi-step process to identify cable client franchise areas and associated 5-digit United States Postal Service (USPS) ZIP codes and, in turn, produced a statistical allocation figure. The allocation figure identifies the percentage of a ZIP code's total block level Census households located within a particular franchise area.

MediaBiz's ZIP code mapping process was utilized in order to obtain proper allocation figures to "split" ZIP codes into their respective franchise areas. Once MediaBiz correctly identified each franchise area in consultation with Cablevision, MediaBiz mapped all potentially overlapping ZIP codes to each franchise area.

Per this mapping, MediaBiz identified, in square miles, those portions of a ZIP code area within a particular franchise area. MediaBiz then populated the split ZIP code boundaries with census block households per the 2000 Census.

The process produced, for each ZIP code: (1.) the total census block level HHS in the entire 5-digit ZIP code; (2.) The census block level HHS in the portion of the ZIP code that overlaps the franchise area; and (3.) a percentage figure, corresponding to the portion of the ZIP code HHS within the franchise area.

The percentage figure yielded above was then applied to the direct-to-home (DTH) satellite subscriber counts provided by the SBCA. This, in turn, produced an adjusted DTH count (referred to above as "DTH"), which reflects a statistical estimate of the number of actual DTH subscribers (i.e., households) residing within each franchise area. The DTH count is divided by the total Census HHs for each franchise to produce the Effective Competition penetration estimate reported above.

Our methodology has been used by many multiple system operators (MSOs) as part of their Effective Competition relief efforts, and we believe this methodology produces the most accurate and detailed view of 5-digit ZIP code data as it relates to cable franchise areas.

Document Preparation Date: 24 Jan 2012

Following a detailed analysis of Cablevision franchise areas, utilizing direct to home (DTH) satellite subscriber data provided by the Satellite Broadcasting & Communications Association (SBCA) and occupied households from the 2010 Census, MediaBiz has determined the following effective competition status:

			THE REAL	Census	
				2010	DTH %
Community	County	State	DTH*	Households	Penetration
Millerton	Columbia	NY	140	396	35.35%

<sup>\*</sup>Oldest data from 11/30/2011

To arrive at these results MediaBiz utilized a multi-step process to identify cable client franchise areas and associated 5-digit United States Postal Service (USPS) ZIP codes and, in turn, produced a statistical allocation figure. The process produced, for each ZIP code: (1.) the total census block level HHS in the entire 5-digit ZIP code; (2.) The census block level HHS in the portion of the ZIP code that overlaps the franchise area; and (3.) a percentage figure, corresponding to the portion of the ZIP code HHS within the franchise area.

The percentage figure yielded above was then applied to the direct-to-home (DTH) satellite subscriber counts provided by the SBCA. This, in turn, produced an adjusted DTH count (referred to above as "DTH"), which reflects a statistical estimate of the number of actual DTH subscribers (i.e., households) residing within each franchise area. The DTH count is divided by the total Census HHs for each franchise to produce the Effective Competition penetration estimate reported above.

Our methodology has been used by many multiple system operators (MSOs) as part of their Effective Competition relief efforts, and we believe this methodology produces the most accurate and detailed view of 5-digit ZIP code data as it relates to cable franchise areas.

Document Preparation Date: 24 Jan 2012

Following a detailed analysis of Cablevision franchise areas, utilizing direct to home (DTH) satellite subscriber data provided by the Satellite Broadcasting & Communications Association (SBCA) and occupied households from the 2010 Census, MediaBiz has determined the following effective competition status:

		6	DTIL	Census 2010	DTH %
Community	County	State	DTH*	Households	Penetration
Greenport	Suffolk	NY	176	820	21.46%

<sup>\*</sup>Oldest data from 11/30/2011

To arrive at these results MediaBiz utilized a multi-step process to identify cable client franchise areas and associated 5-digit United States Postal Service (USPS) ZIP codes and, in turn, produced a statistical allocation figure. The allocation figure identifies the percentage of a ZIP code's total block level Census households located within a particular franchise area.

MediaBiz's ZIP code mapping process was utilized in order to obtain proper allocation figures to "split" ZIP codes into their respective franchise areas. Once MediaBiz correctly identified each franchise area in consultation with Cablevision, MediaBiz mapped all potentially overlapping ZIP codes to each franchise area.

Per this mapping, MediaBiz identified, in square miles, those portions of a ZIP code area within a particular franchise area. MediaBiz then populated the split ZIP code boundaries with census block households per the 2000 Census.

The process produced, for each ZIP code: (1.) the total census block level HHS in the entire 5-digit ZIP code; (2.) The census block level HHS in the portion of the ZIP code that overlaps the franchise area; and (3.) a percentage figure, corresponding to the portion of the ZIP code HHS within the franchise area.

The percentage figure yielded above was then applied to the direct-to-home (DTH) satellite subscriber counts provided by the SBCA. This, in turn, produced an adjusted DTH count (referred to above as "DTH"), which reflects a statistical estimate of the number of actual DTH subscribers (i.e., households) residing within each franchise area. The DTH count is divided by the total Census HHs for each franchise to produce the Effective Competition penetration estimate reported above.
